

XM Reddit Engine V2

Build Specification

Objective

Generate Reddit-native posts that:

- Feel like real practitioner experiences
 - Generate engagement and discussion
 - Build persona credibility
 - Seed XM strategic narratives naturally
 - Avoid sounding like marketing, vendors, consultants, LinkedIn, or AI
-

Workflow Overview

SOURCE ↓ STRATEGIC THEME ↓ EXPERIENCE GENERATOR ↓ FRICTION GENERATOR ↓ PERSONA MATCHER
↓ REDDIT WORTHINESS SCORER ↓ POST TYPE SELECTOR ↓ POST WRITER ↓ WORLDVIEW INJECTION ↓
ANTI-LINKEDIN FILTER ↓ REDDITOR TEST ↓ HUMAN REVIEW

STEP 1: STRATEGIC THEME

Input:

- XM keyword clusters
- Competitor content
- Industry news
- Existing discussion opportunities

Output:

```
{ "theme": "Identity Risk", "icp": "Security Operations", "candidate_personas": [ "Lucas", "Connor", "Leon" ] }
```

Allowed Themes:

- Identity Risk
- Exposure Prioritization
- Remediation Efficiency
- Cloud Drift
- Hybrid Infrastructure
- Security Operations

- Continuous Validation
- Attack Paths
- Exposure Validation

Rules:

- No persona selection yet
 - No content generation yet
 - Only determine strategic direction
-

STEP 2: EXPERIENCE GENERATOR

Purpose:

Convert strategic topic into realistic practitioner experiences.

Prompt:

Generate 20 realistic situations that a practitioner could have experienced.

Rules:

- Must feel real
- Must contain operational friction
- Must not mention XM
- Must not mention CTEM
- Must not mention attack graphs
- Must not sound educational
- Must be discussable on Reddit

Format:

Situation: What happened?

Why Frustrating: What annoyed them?

Persona: Who would naturally experience it?

Example:

Situation: Found a service account with domain admin rights that nobody could explain.

Why Frustrating: Nobody owned it.

Persona: Lucas Parker

Generate 20.

STEP 3: REDDIT WORTHINESS SCORER

Purpose:

Filter out boring situations.

Score:

- Curiosity
- Relatability
- Frustration
- Authenticity
- Discussion Potential

1-10 each.

Remove:

- Educational content
- Thought leadership
- Strategic observations
- Vendor-style narratives

Keep top 5.

STEP 4: PERSONA MATCHER

Purpose:

Select persona based on realism.

Prompt:

Which persona would naturally experience this situation?

Do not choose based on strategy.

Choose based on realism.

Output:

```
{ "persona": "Lucas Parker", "confidence": 9 }
```

STEP 5: FRICTION GENERATOR

Purpose:

Find emotional center.

Output:

Annoyance: What specifically annoyed them?

Surprise: What surprised them?

Question: What remains unanswered?

Example:

Annoyance: Nobody owned the account.

Surprise: It had domain admin.

Question: How do other teams solve this?

STEP 6: POST TYPE SELECTION

Allowed:

- War Story
- Observation
- Frustration
- Discussion Question
- Contrarian Insight

Forbidden:

- Thought Leadership
 - Industry Trend
 - Strategic Reflection
 - Leadership Lesson
 - Vendor Commentary
-

STEP 7: REDDIT POST WRITER

Rules:

Start with:

- Something happened OR
- Something was observed

Never start with:

- Opinion
- Lesson
- Trend
- Strategic statement

Structure:

1. What happened
2. Why it mattered
3. What surprised me
4. Question

Length:

150-350 words

Tone:

- Practitioner
- Human
- Slightly frustrated
- Curious

Not:

- Vendor
- Consultant
- Executive
- Marketer

Forbidden Terms:

- CTEM
- Exposure Management
- Digital Twin

- Risk Reduction Platform
 - Cyber Resilience Framework
 - Holistic
 - Strategic
 - Visibility
 - Ecosystem
 - Transformation
-

STEP 8: WORLDVIEW INJECTION

Purpose:

Allow XM narrative to emerge naturally.

Allowed:

- attack path
- lateral movement
- blast radius
- ownership
- prioritization
- remediation

Maximum:

1 concept per post.

If it feels forced:

Do not inject.

STEP 9: ANTI-LINKEDIN FILTER

Reject if:

Contains:

- holistic
- strategic
- framework
- transformation
- maturity
- visibility

- ecosystem
- journey
- operating model

Reject if:

- Sounds like keynote speaker
- Sounds like consultant
- Sounds like vendor blog
- Sounds like LinkedIn post

Rewrite automatically.

STEP 10: REDDITOR TEST

Prompt:

Would a tired engineer write this at 10PM?

Answer:

YES or NO

If NO:

Rewrite.

Repeat until YES.

CONTENT MIX

60% Community/Karma

Examples:

- Sysadmin frustrations
- Azure issues
- AWS ownership problems
- Kubernetes headaches
- Vulnerability management discussions

25% Operational Frustrations

Examples:

- Ticket ownership
- Patch delays
- Identity cleanup
- Cloud drift

10% Worldview Seeding

Examples:

- Prioritization
- Attack paths
- Validation
- Remediation bottlenecks

5% Direct XM Narrative

Examples:

- Continuous validation
- Exposure-centric thinking
- Choke points
- Identity-centric risk

GLOBAL SYSTEM RULE

Do not write about cybersecurity concepts.

Write about people dealing with cybersecurity problems.

The concept should emerge from the story.

Never teach.

Never lecture.

Always discuss.

If the post feels like LinkedIn, rewrite it.

If the post feels like Reddit, publish it.
